Accessories for loading docks

WHEEL CHOCK

This safety chock/wedge **ensures the safety of workers** operating at loading docks.

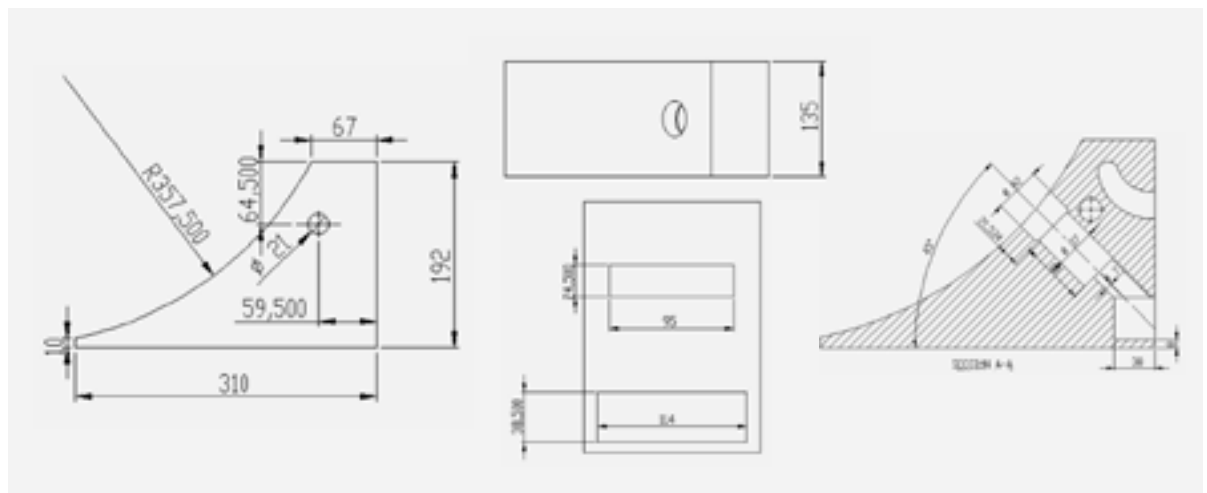

It secures the truck's wheels, preventing movement during loading and unloading, thus protecting workers, facilities, and goods from damage.

This product is designed for intensive use under extreme working conditions.

Constructed from robust materials without complex electronics, it avoids dock blockage in case of electronic failure.

MATERIAL PROPERTIES

Hardness	DIN 53505	A	90 - 95
Tensile strength	DIN 53504	Mpa	50
100% Modulus	DIN 53504	Mpa	8
200% Modulus	DIN 53504	Mpa	11.2
300% Modulus	DIN 53504	Mpa	16.5
Elongation at break	DIN 53504	%	550

ACCESORIES

The chock hanger is essential in loading docks as it prevents accidents and optimises operations by ensuring that chocks are always accessible and the work area is organised.
